

**Webinar:
Industry 4.0 for manufacturing to improve
the resilience and competitiveness in a
post COVID-19 world**

Date & Time: 9:30 – 10:30 am
Tuesday, 8th September 2020

[REGISTER NOW](#)

Covid-19 has impacted the manufacturing sector and its supply chains. Many companies have seen demand drop, losses in productivity and disruption to supply chains largely due to rapidly changing consumer behaviour and demand.

Like all sectors, the manufacturing sector will go through a period of change in the post Covid-19 world. Industry 4.0 technologies and solutions can play a key role in helping manufacturing companies cope with unprecedented challenges and remain resilient and competitive.

Join us at our webinar on ***“Industry 4.0 for manufacturing to improve the resilience and competitiveness in a post COVID-19 world”***. Hear from i4.0 experts and solution providers who will share their experience and views on how companies could leverage i4.0 solutions to improve your business, especially in the following area:

- Digital performance management
- In-line or remote quality testing
- Track-and-trace functionality
- Automatic and human machine collaboration
- Autonomous planning to identify demand changes
